CONTENTS

36 About the conference
Loredana Di Lucchio, Lorenzo
Imbesi

49 EXHIBITIONS

51 ARTIFICIAL | City of Experiences
George Brown College, Canada

54 LANGUAGES | Post collaboration
as a form of counter-culture: The
birth of new languages
University of Johannesburg,
South Africa

57 LIFE | Design for social problems
in Mexico: living with disabilities
Autonomous Metropolitan
University, Azcapotzalco, Mexico

60 MAKING | New Textile
Topologies: Experiments at the
intersection of surface, textile
and form
The Swedish School of Textiles,
Sweden

63 MULTIPLICITY | Self-Acceptance
to Self-Indulgence
Pearl Academy, India

66 NEW NORMAL | Expedition 2
Degrees
Zurich University of the Arts

69 PROXIMITY | Newcomers: Design
for Immigrants
Pratt Institute's School of Design,
USA

72 RESILIENCE | Designing for
Resilience: Creating new
possibilities for industrial cities
University of Monterrey, Mexico

75 REVOLUTION | UFØ Drift: In
Search of Practice
ArtEZ University of the Arts
Arnhem, Netherlands

78 THINKING | Design and
awareness: user meeting
ESDAP Catalunya, Spain

81 DESIGN CULTURE (OF) ARTIFICIAL

83 A participated parametric design
experience on humanoid robotics
Francesco Burlando, Xavier
Ferrari Tumay, Annapaola Vacanti

99 A systemic vision for the common
good : |C|A|S|E| Goods Mobility
in the fourth industrial revolution
Veneranda Carrino, Federica
Spera

CONTENTS

-
- 117 **Activist Activated: Efficacies of AR Political Poster Design**
Sarah Edmands Martin
-
- 130 **Art, Design, and Mathematics: Software programming as artifice in the creative process**
Carlos de Oliveira Junior, Eduardo Ariel de Souza Teixeira
-
- 142 **Artificial Creativity – Hybridizing the Artificial and the Human.**
Yael Eylat Van Essen
-
- 156 **Artificial Intelligence is a Character? Exploring design scenarios to build interface behaviours**
Andrea Di Salvo, Andrea Arcoraci
-
- 168 **Becoming Janus: The Subversive Potential of Face Recognition Technologies**
Romi Mikulinsky
-
- 181 **Between digital and physical. Envisioning and prototyping smart material systems and artifacts from data-informed scenarios.**
Stefano Parisi, Patrizia Bolzan, Mila Stepanovic, Laura Varisco, Ilaria Mariani
-
- 199 **Consensual (Design) Fictions: co-creating iterative use cases to define technology conceptualization**
David Hernández Falagán, Andreu Belsunces Gonçalves, Kevin Koidl
-
- 215 **Design of robotic for superhuman tasks**
Fabrizio Formatì
-
- 227 **Design, space management and work tools: enhancing human work in transition to Industry 4.0**
Luca Casarotto, Pietro Costa, Enrica Cunico
-
- 237 **Designers' skills for Social Robotics**
Maximiliano Romero, Giovanni Borga, Rohan Sashindran Vangal, Francesco Baldassarra
-
- 251 **Designing for the future by understanding evolving culture based on advancing technology and the changing behaviours that accompany it.**
Nayna Yadav
-
- 264 **Designing Somatic Play for Digital Natives through a Body-centric Design Process**
Seçil Uğur Yavuz, Kristi Kuusk, Michaela Honauer
-

CONTENTS

-
- 279 Designing unpredictable futures. An anthropological perspective on the algorithmical prediction of human behaviour
Giovanna Santanera, Roberta Raffaetà
-
- 290 Digital Creativity Tools Framework
Marita Canina, Carmen Bruno
-
- 304 Digital tools that support students to reflect on their design competency growth paths
John Fass, Job Rutgers
-
- 316 Domestic AI and Emotional Involvement. Design Perspectives
Mauro Ceconello, Martina Sciannamé, Davide Spallazzo
-
- 328 Empowered by Code, to act in real word
Alfredo Calosci
-
- 339 Exploring Digital Inequalities: How Welfare States are disappearing behind an AI
Paola Pierri
-
- 349 From Decoration to Functionality — Research on smart accessories design in the Internet era
Qingman Wu
-
- 360 From the evaluation of acceptability to design of an assistive robot for elderly
Francesca Tosi, Mattia Pistolesi, Claudia Becchimanzi
-
- 376 Future heritage and heritage futures. A design perspective on the activation of Digital cultural heritage stored in archives
Margherita Tufarelli
-
- 386 Going beyond the problem of privacy: individual and social impacts of the use of personal information in connected services
Laura Varisco
-
- 400 Human and Artificial Intelligence for the Cultural Reform of Design
Elena Laudante, Mario Buono
-
- 412 Human Sensibility, Robotic Craft: Toward Autonomous Stonework
Tom Shaked, Karen Lee Bar-Sinai, Aaron Sprecher
-
- 423 Interface takes command. Educational environments, tools and practices to face the new normal.
Alessio Caccamo
-
- 437 Intelligent Voice Assistants: A Review of User Experience Issues and Design Challenges
Lucia Rampino, Sara Colombo
-

CONTENTS

-
- 449 Research on Gender Differences of Adult Head Shape in China
Renke He, Wenxiu Yang,
Wanshan Li, Haining Wang
-
- 461 Speculative Physical Models Created Through a Robotic Process
Sara Codarin, Karl Daubmann
-
- 476 Teaching Design in the Age of Platforms: A Framework for Platform Education
Xinyi Li
-
- 488 The body as an artefact: a case of hand prosthesis
Venere Ferraro, Silvia Ferraris,
Lucia Rampino
-
- 502 The design of human machine interfaces: from data to risk prevention.
Annalisa Di Roma, Alessandra Scarcelli
-
- 516 The Designer in the AI/Machine Learning Creation Process
Frederique Krupa
-
- 526 The encounter between Design and Artificial Intelligence: how do we frame new approaches?
Marzia Mortati
-
- 537 The Perceptual and Dialogical Form of Design between Time, Space and Technologies
Camelia Chivăran, Sonia Capece
-
- 552 The role of Design in telepresence robotics experience
Claudio Germak, Lorenza Abbate
-
- 565 The Venice Backup: Case studies on the use of Virtual Preservation Techniques on Architectural Heritage sites in Venice, Italy
Kai Reaver
-
- 587 Towards a visual-based survey on explainable machine learning
Beatrice Gobbo
-
- 604 Toys and Play, Weapons and Warfare: Militarizing the Xbox Controller
Rachel Berger
-
- 619 Wearing the smart city: Supporting older adults to exercise by combining age-friendly environments and tailored digital public data
Nicole Aimers, Alen Keirnan, Ann Borda, Sonja Pedell
-

CONTENTS

629	DESIGN CULTURE (OF) LANGUAGES	754	Data visualization as a qualitative driver in knowledge communication: an interpretative framework Giulia Ciliberto
631	A Sidewalk museum. Exhibiting the collective dimension of the moving image Nicolo Giacomo Ceccarelli, Marco Sironi, Sabrina Melis	771	Design and Cultural Sites: New signage methods and languages for fruition, accessibility and storytelling Monica Oddone, Irene Caputo, Marco Bozzola
645	Abstract to figurative, and everything in between: visual design approaches and linguistic codes of a traditional form of animated product. Vincenzo Maselli, Eleni Mouri	786	Design and the 'Magical magic'. Disney and history, perceived heritage and shared memory Luisa Chimenz
659	Al-Kafiye: A Symbol of Change Hala Abdel Malak	800	DEsign DEcide The sign Tsvetomira Girginova
688	Beyondstories. People Narrative makes a Territory Aureliano Capri, Valeria Michetti, Veneranda Carrino, Mauro Palatucci	811	Designing the Gross. In search for social inclusion Adrien Rigobello, Nadja Gaudillière-Jami
707	Brand in Product. The language of the brand to govern complexity Mario Rullo, Massimiliano Datti	828	Finding New Representations of Old Knowledge: a design study of visualizing I-Ching Yvette Shen
726	Creating Visual Identity as Constellation: Methodological Project for a Design Workshop Ximena Izquierdo, Magdalena Ballacey	843	Form is function. Ethics and aesthetics of digital technologies in inclusive interface design. Letizia Bollini

CONTENTS

-
- 852 'Graphicmance'. New Visual Languages between Design and Performance
Giulia Scalera
-
- 865 Inner Geographies as poetic-aesthetic knowing: the inspiration and manifestation of creative doings through an emotively-orientated sensory methodology
Mizan Rambhoros
-
- 883 Italian Pavillion at XXII Triennale di Milano
Ilaria Bollati, Luisa Collina, Laura Daglio, Laura Galluzzo
-
- 895 Language and identity in new Italian design
Stefano Follesa, Peian Yao
-
- 906 Metaphors as Knowledge Activators in Data Visualizations: the case of the Archipelago of Calvino's literary works
Tommaso Elli, Maria de los Angeles Briones Rojas, Beatrice Gobbo, Margherita Parigini, Virginia Giustetto, Valeria Cavalloro, Michele Mauri
-
- 925 Patient Autonomy Indicators: a knowledge visualization tool for patient autonomy support
Wen Zhang, Yuan Liu, Li Hou
-
- 938 Performativity as a language of sense-making for cultural service in local museum
Shu Hongming, Eleonora Lupo
-
- 950 Solid perspectives and optical corrections of spaces in graphic & architectural design
Tommaso Empler, Adriana Caldarone, Alexandra Fusinetti
-
- 962 Spatial construction for ideational meaning: An analysis of interior design students' multimodal projects.
Andrew Gill, Giovanna Di Monte-Milner
-
- 976 Tales of Surprise: Exploring Sense Making Processes Through User Narratives
Miray Hamarat, Ozge Merzali Celikoglu
-
- 992 The Design of Politics: Understanding the Arrest of Cesare Battisti Through the New Media Factor
Noemi Biasetton
-
- 1007 The Enlightenment of the Contemporary Transformation of Chinese Traditional Visual Space Perception on Cultural Sustainability design for all
Jixiang Jiang, Dong Tao
-

CONTENTS

1021 The Interplay between Ethics and Aesthetics in Intelligent Systems-Users Interaction
Gabriele Barzilai

1034 The pluralistic aesthetics of nowadays design
Francesca La Rocca

1049 The role of vernacular typography in the linguistic landscape of multicultural Singapore: A multimodal analysis case study of a gentrified street
Min-Yee Angeline Yam

1063 The Threshold of Language: Design and Soma
Daniela Monasterios-Tan, Susan Sentler, Ginette Chittick

1082 Towards a new design culture of scientific production – Innovating the formats of scientific publication of design
Eleonora Lupo, Beatrice Gobbo, Emilio Lonardo

1098 Translation Design for medicine leaflets. Research and innovation.
Elena Caratti, Antonella Penati, Valeria Bucchetti

1115 Visual dialects. Exploring early design sketching in various design disciplines
John Daniel Öhrling, Åsa Wikberg-Nilsson

1127 Visualizing Offshore Foreign Direct Investments: The Atlas of Offshore
Michele Mauri, María De Los Angeles Briones Rojas, Jonathan Gray, Daniel Haberly, Chris Anderson

1144 What does this symbol mean? Icons as a Language for Emergency
Rodrigo Ramirez

1159 Where methods meet form
Meret Ernst, Maya Ober

1175 DESIGN CULTURE (OF) LIFE

1177 Adopt a costumer - to design new processes and packagings
Maria Benedetta Spadolini, Chiara Olivastri

1190 Autonomy as a Design Principle: Service Design for the Technology Literacy of Older Adults
Houjiang Liu, Miso Kim, Canqun He, Tia Thomson

1208 Bio-revolutions: radical change, design cultures and non-humans
Carolina Ramirez-Figueroa, Luis Hernan

CONTENTS

-
- 1222 Cognitive Ergonomics
Components for Analysis of User
Interface in Healthcare Industry
Mariia Zolotova, Angela
Giambattista
-
- 1238 Connect art and science for a
functional biomimicry in design
Andrea Forges Davanzati
-
- 1244 Development of a test setup for
validating a cognitive assessment
platform within ICU's
Muriel De Boeck, Philippe Jorens,
Guido De Bruyne, Kristof Vaes
-
- 1256 Food design as a tool for social
development: experimental study
in the evaluation of child smell
Lígia Afreixo, Francisco
Providência, Sílvia Rocha
-
- 1272 FUTUR.DRESS. The Superskin for
the Human Body in nearspace
Maria Antonietta Sbordone, Ilaria
Giampetraglia, Alessandra De
Luca
-
- 1286 Hybrid systems of human |
technological | biological
products: a road to a greater
sustainability?
Marco Marseglia, Francesco
Cantini, Alessio Tanzini
-
- 1301 No more whining – natural smart
textile
Nuutinen Ana, Pietarine Heidi,
Kunnas Susan , Korpinen Risto,
Sipola Reeta
-
- 1308 Paving the way to post-digital
smart materials. Experiments on
human perceptions of a bio-
inspired cellulosebased
responsive interface
Stefano Parisi, Markus Holzbach,
Valentina Rognoli
-
- 1325 The flow of emotions in co-
creation
Mariluz Soto, Caoimhe Isha
Beaulé, Satu Anneli Miettinen
-
- 1337 The Food Futures Teaching
Cluster. Food Culture, Visual
Communication Design, and
Collaboration
Peter K. Chan, Ben McCorkle, Rick
Livingston
-
- 1351 The river and the revered: Tracing
the impermanence of the land,
the people and the embroidered
Indrajit De, Saumya Pande
-
- 1364 The Shape of Drugs: a matter of
Human-Centred Design
Antonella Valeria Penati, Silvia
Luisa Pizzocaro, Carlo Emilio
Standoli, Valeria Maria Iannilli
-

CONTENTS

-
- 1377 The Wicked Home: Living Space as Ecological Holobiont
Rachel Armstrong, Rolf Hughes, Nel Janssens
-
- 1392 Three Dimensional technologies: Digitising Nature
Gregor MacGregor
-
- 1405 Towards Neurodesign. The Mental Effort in packaging design
Alessio Paoletti, Lorenzo Imbesi, Angela Giambattista
-
- 1413 “WIT” as a Sustainable Engine Overcoming Mind Fixation in Ideation
Alon Weiss
-
- 1425 **DESIGN CULTURE (OF) MAKING**
-
- 1427 A designed generation: Maker's maturity and social responsibility
Luca D'Elia
-
- 1438 Accumulation of empirical investigation into joint structures in wooden furniture design
Yi Shiang Lin, Ming Huang Lin, Jen Kuan Yau
-
- 1453 Amorphous Stacks: A Low-Tech Construction Method for Jointless Cast Structures
Liqiong Huo, Jongwan Kwon
-
- 1468 An Exploratory Study about Communicating 4D Printing between Product Designers and Manufacturing Engineers
Faten Ezrin Azhar, Eujin Pei
-
- 1482 Biotextiles applied to everyday objects
Viviana Quiña, José Francisco Alvarez Barreto, Cristina Muñoz Hidalgo
-
- 1504 Claudio Alcorso and Post-war Textile Culture
Tracey Sernack-Chee Quee
-
- 1521 Collaborative Capabilities: aural encounters in digital/analogue co-creative making
George S. Jaramillo, Lynne J. Hocking-Mennie
-
- 1535 Collaborative ontology design for Open Hardware and Open Design
Massimo Menichinelli, Emilio Velis, Andre Rocha, Alessandra Schmidt
-
- 1551 Contemporary Spaces of Apparel Design: Embracing both Digital and Physical Environments
Krissi Riewe
-

CONTENTS

-
- 1562 Design Cultures of Making:
Fashion thinking as creative
process and pedagogy
Susan Postlethwaite
-
- 1573 Design culture of playing. The
musical instrument industry: an
important culture of made in
Italy.
Marco Mancini
-
- 1588 Digital encounters in the culture
of textile making: developing a
hybrid craftsmanship for textile
design by fusing additive methods
of surface fabrication with
knitting technology
Delia Dumitrescu
-
- 1600 Distributed design and
production for distributed care.
Investigation on materializing
bottom-up open and indie
innovation in the field of
healthcare
Patrizia Bolzan, Massimo
Bianchini, Laura Cipriani, Stefano
Maffei
-
- 1614 Heterotopia of Space: How
capitalism is alienating and
controlling societies
Sarah Khayat
-
- 1625 I - D (I – Design _ Idiosyncratic
Meta Design) Idiosyncratic
Proceedings on Reading and
Production Meta-Objects in
Contemporary Industrial Design
Mantikou Angeliki-Sofia, Farangas
Athanasios, Zafeiropoulos
Theodoros, Psychoulis Alexandros
-
- 1640 If we can't make it together, we
won't make it alone. The
challenge and potential of
collective making
Lena Håkansson, Stephanie
Carleklev, Stephan Hruza, Anna-
Karin Arvidsson
-
- 1652 Inter-Weaving Culture and Crafts
in Design Education
Puja Anand, Alok Bhasin, Priyanka
Khattar
-
- 1668 Learning through codesign
toolkits. A case study on
codesigning the cinema of the
future
Simone Taffe, Sonja Pedell
-
- 1681 Letterpress: A Survey of Print
Culture or an Immersive Learning
Experience
Alexander Cooper, Rose Gridneff,
Andrew Haslam
-
- 1695 Made by (Material) Frustration
Arielle Blonder, Shira Shoval, Eran
Sharon
-

CONTENTS

-
- 1711 Material culture(s). Research paths in an evolving material design culture, and the connected future designer's attitudes
Doriana Dal Palù, Beatrice Lerma, Claudia De Giorgi
-
- 1724 Mind-mapping in design culture: A tool for ideation in graphic design education?
Philip Jones, Marion Morrison
-
- 1738 New scenarios for developing cooperative platforms for local manufacturing
Alberto Calleo, Giorgio Dall'Osso, Laura Succini, Michele Zannoni
-
- 1752 Playing for change: designing a board game for the circular economy
Thomas David Cockeram, Jessica Clare Robins, Emmanuel Tsekleves, Leon Cruickshank
-
- 1769 Progetto Glume: from milling waste to resource for new materials
Danilo Perozzi, Laura Dominici, Elena Comino
-
- 1785 Re-distributed manufacturing in makerspaces. Towards a model of sustainable production
Louis Rose
-
- 1799 Research on the Application of Lacquer Craft in Modern Accessories
Tianxiao Xie
-
- 1811 The Emerging Fashion-Tech Paradigm in the Contemporary European Landscape
Chiara Di Lodovico, Chiara Colombi
-
- 1825 The evolving role of prototypes in design research: a discussion on terms and meanings
Silvia D. Ferraris, Gabriele Barzilai
-
- 1840 The Making of a Dress: Explicating the Implicit Processes
Adrian Huang
-
- 1857 The shape of wellbeing: investigating an approach for the development of a design requirements framework for design for wellbeing projects
Sandra Dittenberger
-
- 1873 Weaving sequential changes – designing textiles with multiple embedded stages
Riikka Talman
-

CONTENTS

-
- 1891 **DESIGN CULTURE (OF) MULTIPLICITY**
-
- 1893 Architectural Design Education as an Agent of Change: The Case of the Ultra-Orthodox Branch, Jerusalem
Elissa Rosenberg
-
- 1904 “But I’m a lecturer not a therapist”: Educational Coaching – a proposed alternative approach to supporting students through their creative education
Gary Pritchard
-
- 1918 Decoding the birth of transcultural fashion
Shipra Kukreja
-
- 1934 Design as a medium for an informal learning. INDICOLearning from the interface to the activity
Marina Puyuelo, Mónica Val, Hugo Barros da Rochas
-
- 1946 De-stereotype UX Design – Discussing and managing issues related to the clustering of users in the design of innovative solutions
Margherita Pillan, Alessandra Mazzola
-
- 1958 Framing diversity: designing hearing aids from a deaf culture perspective
Patrizia Marti
-
- 1979 Gazes and Gatekeeping: Reconceptualising the entrance portfolio in the post-colony
Diane Steyn
-
- 1994 Hybridity as a culture of making
Maya Ober, Nicole Schneider
-
- 2011 Hyper-Contextual Futures in Mexico City
Paolo Cardini, Karla Paniagua
-
- 2025 Learning and Differences reciprocally shared and validated: A decade long Participatory Design collaboration between KG Elementary School and AD University
Raymond Patrick Zachary Camozzi, Helene Day Fraser, Caylee Raber
-
- 2040 On (un)becoming in Design Academia: A Coloured female’s autoethnography
Cheri Hugo
-
- 2058 The Ethics of Knowing a Shared Language and Intention in Design
Lisa Elzey Mercer, Terresa Moses
-

CONTENTS

-
- 2066 The Neighbourhood Home. System of environments for plural inclusion
Ilaria Longo, Sonia Massari, Alessandro Spalletta
-
- 2081 Universal Visual Languages in a Male-oriented Society
Valeria Bucchetti, Francesca Casnati
-
- 2095 **DESIGN CULTURE (OF) NEW NORMAL**
-
- 2097 A Comparative Study of Online Teaching Modes of Sino-Italian School of Design: A Politecnico di Milano, Tsinghua University, and Tongji University perspective
Fan Chen, Lin Li
-
- 2107 A COVID-19 Horizon Scan Looking for Post-Pandemic Implications for Design
Marcus Foth, Glenda Amayo Caldwell, Joel Fredericks
-
- 2126 A new way of perceiving the locality: economic growth, social inclusion, environmental protection
Fabio Mongelli
-
- 2141 A Sustainable Jewellery Design Practice for Psychological Health after Covid-19
Huiyi Qu
-
- 2153 Autopoietic design; seven components for a sustainable future design model
Gonzalo Raineri Bernain
-
- 2165 Community-led design capabilities during the COVID-19 pandemic and beyond
Mariana Fonseca Braga, Eduardo Romeiro Filho, Haddon G. Guimarães Pereira, Emmanuel Tsekleves, Rosângela Míriam L. O. Mendonça
-
- 2182 Cross-Team Brainstorming and a Comparison of Online to Physical Version
Heng-Yi Mie, Hsi-Jen Chen
-
- 2198 Design Education in a Pandemic Context
Harald Skulberg
-
- 2210 Design for Sustainable Healthcare. Cutting the impact of medical products through disposable packaging
Gabriele Maria Cito, Angela Giambattista
-

CONTENTS

-
- 2227 Designing new learning experiences in pandemic time: how digital can support a new didactic in Service Design
Andrea Taverna
-
- 2239 Ecosystem Framework for Community Life Circles based on Life Projects in the Post-COVID-19 Era
Tao Chen, Yong-Ki Lee, Juyoung Chang
-
- 2253 Expansive Video Capture – Up close, personal & specific tutoring “performances”
Brendon Clark
-
- 2265 Gamified e-Learning approached through Emotional Design in the Post-Covid-19 era
Na Wei, Yong-Ki Lee, Juyoung Chang
-
- 2275 Healthcare innovation during the pandemic time: digital technologies to enhance clinic 4.0
Stefania Palmieri, Mario Bisson, Alessandro Ianniello
-
- 2289 Hospitals’ decision-making regarding infrastructural adaptations in response to Covid-19
Pleuntje Jellema, Margo Annemans, Ann Heylighen
-
- 2302 Identifying Factors for Designing a Successful Telemedical Training System for Remote Pediatric Physical Exams
Elham Morshedzadeh, Ph.D., Andre Muelenaer, MD, Jr, MD, MS,, Michelle Morris, Dana Werlich, Margaret Nelson, MD.
-
- 2316 Inter-University Design Workshop: plurality in design education
Inés Alvarez-Icaza Longoria, Diego Alatorre Guzmán, René Harari Masri, Lucero Donaji De la Huerta Santaella, Ana Elena Hernández Palomino
-
- 2332 Kids-centered Pocket Park design. Well-being for children in the urban post-covid context.
Benedetta Terenzi, Anna Laura Pisello
-
- 2347 Nanomedicine and Tourism in the post-pandemic era: smart “mobility & health” through wearable design for lab-on-chips
Claudio Gambardella, Pietro Ferraro, Assia D'Alesio
-
- 2358 Post-pandemic medicines: towards a new normality
Antonella Valeria Penati, Carlo Emilio Standoli, Patrizia Bolzan
-
- 2372 Reaching Audiences in 2020
Sharon Hooper
-

CONTENTS

-
- 2387 (Re)envisioning the contribution of design to the sustainable transition of healthcare systems
Amina Pereno
-
- 2404 Reinforcing Networks of Place-Based Care and Resilience
Julie Van Oyen, Jacquie Shaw, Laura Kozak, Jean Chisholm
-
- 2419 Research on rapid mass production of emergency products based on FDM 3d printing
Xueyan Wang, Dongmei Peng
-
- 2433 Semi-immersive Virtual Habitat to Enhance Relaxation in People with Dementia during COVID-19 Emergency
Silvia Maria Gramegna
-
- 2446 Shifting paradigms in Sustainable Fashion Design education: Studying implications & effectiveness of pedagogical methods adopted in a pandemic setting
Pragya Sharma
-
- 2471 Strengthening city resilience through the re-orientation of a social innovation incubation programme in Covid-19 time. The case of 'The School of the Neighbourhoods'
Marta Corubolo, Anna Meroni, Daniela Selloni
-
- 2487 Telemedicine, today more than ever. The ABBRACCI design concept for COVID-19 patient monitoring
Alessia Buffagni, Martina Frausin
-
- 2500 The Challenges and Benefits of online Education and the possible impacts of the entry of IT firms in the education ecosystem
Nayna Yadav
-
- 2512 The design culture and the challenges of the new normal
Nicola Morelli
-
- 2524 The effects of eye expression on emotion perception
Yi-Hsun Liu, Hsi-Jen Chen
-
- 2537 The value of design in the emergency-driven scenarios. Crafting Ecosystems with data
Francesco Dell'Aglio, Enza Migliore, Chiara Scarpitti
-
- 2551 Thinking With Card: Curriculum-Led Making Activities Integrated with Distance Learning
Benjamin Hughes
-

CONTENTS

2569 Understanding public health communication design globally during the Covid-19 pandemic: The Good, the Bad and the Ugly
Emmanuel Tsekleves, Mariana Fonseca Braga, Alejandro Moreno-Rangel, Linli Zhang, Mafe Salazar, Hannah Field, Hayley Alter

2594 "United in isolation. An online letterpress festival". A community response to the Covid-19 pandemic
Andrea Vendetti, Elettra Scotucci

2604 **DESIGN
CULTURE (OF)
PROXIMITY**

2606 A Design Experience for Interactive Narrative Based on The User Behavior
Yuan Yao, Haipeng Mi

2619 An answer to the complex representation of territory. The fertile ground of mnemotopes and design of communication.
Clorinda Sissi Galasso, Giovanni Baule

2630 Attractive Factors in the Experience of an Online User-supported Learning Platform
Min-Yuan Ma, Hsin-Yi Huang, Eric Chen-F Hsieh

2650 City Branding and Fictional Layers: Reading Istanbul through Filming Locations
Zeynep Arda, Onur Mengi, Deniz Deniz

2667 Co-Design processes for the inclusiveness of Rome's temporary communities
Gianni Denaro, Luca D'Elia, Safouan Azouzi

2679 Co-designing the future of a public space and its related services. The case of the Reggio Emilia Ducal Palace and its park
Marta Corubolo, Anna Meroni, Daniela Selloni

2694 Collaborative Futures: a pedagogical model for delivering future-focused and citizen-centred design education

Data visualization as a qualitative driver in knowledge communication: an interpretative framework

Giulia Ciliberto^a

^a Iuav University of Venice

*giulia.ciliberto@iuav.it

Abstract | The growing cultural relevance of data literacy requires a deeper acknowledgement and assessment of the role that data visualization can play if interpreted as a mean to increase the quality of information besides reporting its quantitative features, being therefore actively integrated within the current ecosystem of knowledge communication. In fact, while data visualization is often considered as a merely quantitative tool for information analysis and reporting, the methodologies underpinning this particular branch of visual communication go far beyond the simple restitution of numbers and sizes, frequently approaching more qualitative stances. Highlighting an implicit correlation between data visualization and qualitative research, the present contribution proposes an interpretative framework based on a set of five comparative analogies, in relation to which a same number of emergent fields of application for data visualization are identified, described, and contextualized.

KEYWORDS | DATA VISUALIZATION, QUALITATIVE RESEARCH, KNOWLEDGE COMMUNICATION, INTERPRETATIVE FRAMEWORK, COMPARATIVE ANALOGY

1. Introduction

Since the early years of the new millennium, alongside the massive acceleration occurring in the technologic system, a growing interest in investigating the role of visualization in the production, transmission, and dissemination of knowledge started to spread transversally within the international research community (Burkhardt, 2008).

Definable as the realm of knowledge communication, this now well-established disciplinary current has frequently pointed out the strong potential of data visualization – broadly intended as the visual representation of data through both analogical and digital means – in dealing with the surplus of information generated by contemporary society. In fact, the observation of recent trends in this field seem to testify how, despite a remarkable aesthetic diversity, many experiences tend to accomplish common principles and procedures, which “result in a type of emergent taxonomy [...] and reveal the initial building blocks of a new visual language” (Lima, 2013, p. 159).

Nowadays, the flourishing iteration of efforts aimed at codifying the syntax of this language, and addressing its widespread dissemination, represent a major cultural issue in terms of data literacy, since “in the information age the ability to read and construct data visualizations becomes as important as the ability to read and write text” (Börner, Bueckle & Ginda, 2019, p. 1857). For this reason, it is important to emphasize how, while data visualization is often considered as a merely quantitative tool for information analysis and reporting, the methodologies underpinning this branch of visual communication go far beyond the simple restitution of numbers and sizes, frequently approaching more qualitative stances (North, 2006).

This attitude recalls quite impressively the domain of qualitative research, definition standing for an array of strategies shared by many academic disciplines “for conducting inquiry [...] aimed at discovering how human beings understand, experience, interpret, and produce the social world” (Sandelowsky, 2004, p. 893). More than with exact counts or measures, qualitative data analysis is concerned with the detection of meanings, concepts, definitions, characteristics, attributes, metaphors, symbols, and descriptions of things, constructing research outputs suitable for being returned according to interpretative, discursive and thematic paradigms.

This analogy, highlighting an implicit correlation between data visualization and qualitative research, represents the common thread of the present contribution, aimed at defining an interpretative framework suitable for evaluating data visualization, and its potential qualitative impact, in relation to the broader field of knowledge communication.

2. The growing relevance of data literacy

It is important to premise that, within the bounds of this reasoning, the notion of knowledge communication will be primarily understood in its role of fundamental human prerogative, as “the (deliberate) activity of interactively conveying and co-constructing insights, assessments, experiences, or skills through verbal and non-verbal means” (Eppler, 2007, p. 291). This interpretation reverberates in the ultimate purpose of data visualization, which resides in the willingness of formalizing – through the design of infographic outputs such as tables, graphs, charts, diagrams, maps, or similar – a common language able to communicate information across cultural, translational, and disciplinary boundaries.

Such an attitude gains even more significance in view of a technological system which has led in few years to “the datafication of everything” (Mayer-Schönberger & Cukier, 2013, p. 194), and where the increasing proliferation of new digital devices, networks and infrastructures endorses the possibility of mapping the world in a mostly quantifiable, analyzable and computable way.

As we are all surrounded by information operating at varying degrees of immediacy to our lives, becoming at the same time both data producers and data consumers, it is important to identify and develop the “competencies that make up the all-round talents of a visualizer as well as those required to be an efficient viewer” (Kirk, 2016, p. 385). From this point of view, data visualization designers should start to operate according to a stance which is not simply data-driven, but also and especially data-informed and data-aware (Tan & Churchill, 2018), being able to encode new ways to turn information into value, and define the best ways to address them to a particular audience.

At the same time, also qualitative researchers began to advance the claim for redefining the traditional methodologies employed in gathering, analyzing and summarizing data, in order to understand more deeply how these activities affect the general process of investigation in the midst of the “information explosion” (Major & Savin-Baden, 2012).

The growing cultural relevance of data literacy requires a deeper acknowledgement and assessment of the role that data visualization can play if interpreted as a mean to increase the quality of information besides reporting its quantitative features, and actively integrated within the current ecosystem of knowledge communication. In this sense, it is of paramount importance to emphasize the qualitative features of data, from “the most personal information that is essential for our physical survival to the most abstract form of information that encompasses our personal myths, cultural development, and sociological perspective” (Wurman, 2001, p. 160).

Moving from these premises, the essay outlines a range of analogical – rather than strictly logical – arguments to support data visualization designers in gaining awareness about their role in turning quantitative information into qualitative experiences, fostering more consciousness in dealing with the increasing complexity of the world we live in.

3. The qualitative value of data visualization

Since the most ancient times, the visual display of information has been practiced across an extremely wide range of disciplines – ranging from mathematics to architecture, from economy to medicine, going up to sociology, psychology, music, art, and many others – as a vehicle to address sector-specific epistemology. It is also because of this transversality that data visualization has struggled for a long time to find its own disciplinary status, which started to effectively establish only around the mid-nineteenth century, meeting the need for managing a growing amount of statistical units becoming more and more significant to understand modern society.

However, while in the last decades data visualization has largely focused on quantitative processes of exploration and analysis, some of its earliest examples were created to show and explain that “the elements to be transformed [...] were no longer just quantities and numbers, but qualitative and semantic elements as well” (Burgio & Moretti, 2017, p. 893).

If we consider the achievement of a balanced ratio between evidence and rhetoric as an essential requirement for translating data into meaningful representations, experts in the field require to develop both statistic and design knowledge, since “without the former, visualization becomes an exercise only in aesthetics, and without the latter, one of only analyses” (Yau, 2013, p. xi). In this sense, data visualization community is growingly stressing the need for its practitioners to adopt explanatory, beyond simply exploratory, strategies in their design approaches, aimed at detecting relationships that may be hidden by summary statistics, and communicating interpretative insights inferred from scrutinized data (Barlow, 2014).

In turn, the potential of incorporating data visualization in qualitative research also started to be acknowledged, firstly as a way for generating hypotheses and developing theory, and secondly a mean to give readers the possibility of seeing the author’s meaning represented in more ways than just verbally and textually (Verdinelli & Scagnoli, 2013).

In light of these considerations, could then data visualization be considered as a qualitative driver in knowledge communication? To validate this perspective, an interpretative framework bridging together data visualization with the domain of qualitative research is proposed and applied pointing out a group of comparative analogies.

On the one hand, five methodological categories are borrowed from the most prominent traditions detectable in qualitative research, as masterly synthesized by John W. Creswell (2006) as:

- narrative approach
- ethnographic approach
- grounded theory approach
- phenomenological approach
- case-study approach

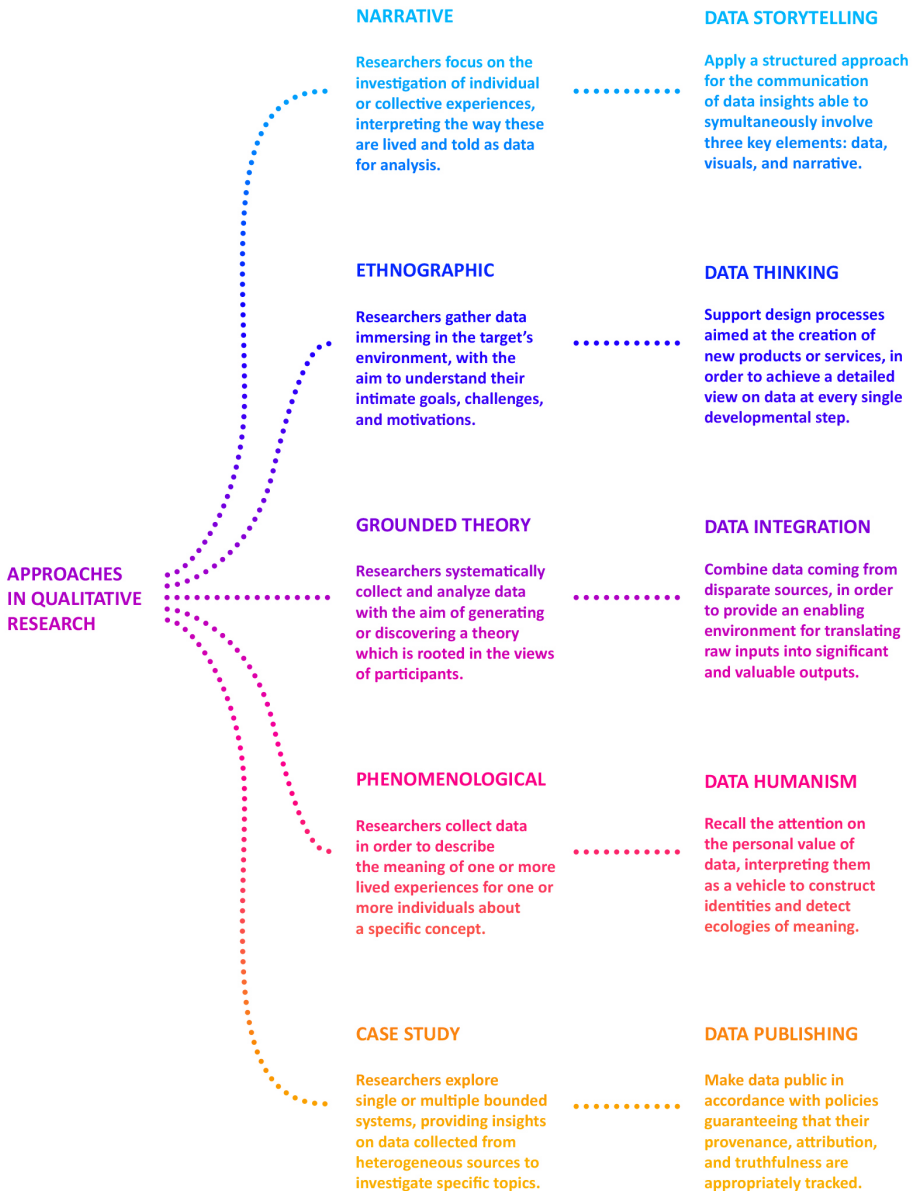

Figure 1. Schematic visualization of the framework proposed in the article.

On the other hand, the aforementioned categories are employed to identify, describe, and contextualize a same number of emergent fields of application for data visualization, emphasizing how these inherently promote a qualitative treatment of information:

- data storytelling
- data thinking
- data integration
- data humanism
- data publishing

3.1 Data storytelling

The first comparative analogy outlined in the proposed framework relates the discipline of data visualization to the qualitative mode of inquiry known as narrative approach, in which researchers focus on the investigation of individual or collective experiences, interpreting the way these are lived and told as data for analysis (Creswell, 2006). The procedures for implementing this methodology imply in the first place the collection, examination and interpretation of data in order to identify units and patterns of meaning, and afterwards the assemblage of those segments according to a clear narrative structure and a temporal – yet not necessarily linear – criterion.

This perspective, where a strong epistemological priority is assigned to the readability of research outputs, inherently points out the role of data visualization design in enhancing the sensorial and synesthetic features “that provide a narrative structure and guide the reader through the story” (Kosara & Mackinlay, 2013, p. 48).

In the last two decades, the narrative instance of data visualization has found an attainable and prolific field of application in the domain of data storytelling, a now diffused label identifying a structured approach for the communication of data insights involving a combination of three key elements: data, visuals, and narrative (Dykes, 2016).

Above all, data storytelling requests data visualization designers to deeply understand the distinguishing features of diagrammatic representation, being able to adopt the appropriate choice to convey specific information, and to translate them into both online and offline communication strategies (Lankow & Crooks, 2012). It is interesting to observe how strongly those competences would impact the treatment of data, since “whether genres are pure or mixed, words or graphics, ordered or not, every piece of discourse requires authors to select the information that is relevant, to express it felicitously, and to link the pieces into a whole” (Riche, 2018, p. 26).

Among the major expressions of data storytelling, one cannot omit the reference to the practice of data journalism, whose origins are traceable since the mid-twentieth century and which today represents one of the most important vehicles for the production of news stories, where visualization is structurally involved to highlight relevant topics.

A leading figure in this scenario is undoubtedly that of Alberto Cairo, Spanish information designer interested in the convergence between visual design and cognitive sciences, working in the field of data journalism since the early 2000s and currently director of the Visualization Program at the University of Miami's Center for Computational Science. In his PhD thesis, entitled *Nerd Journalism. How Data and Digital Technology Transformed News Graphics*, Cairo investigates "how news graphics has changed as a practice, as a professional endeavor, and as a set of products" (Cairo, 2018, p 17), redefining the search for a balance between the objectivity of representation and the aesthetics of communication.

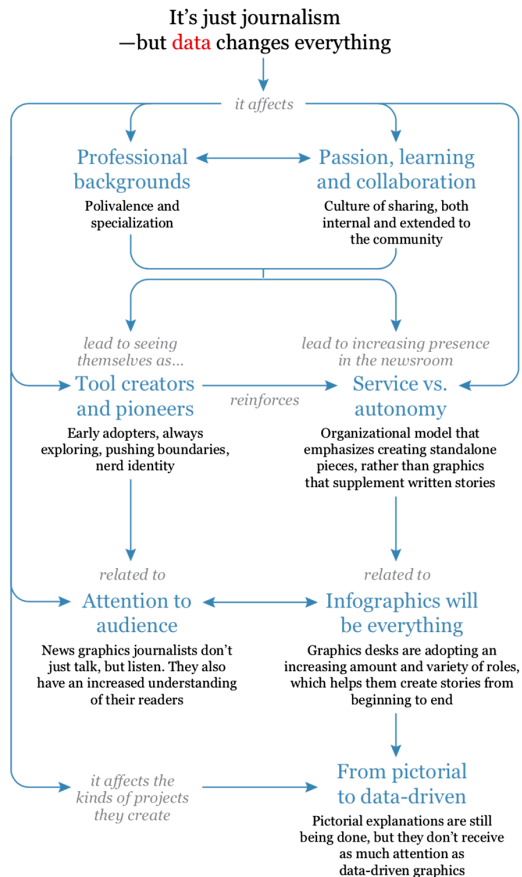

Figure 2. "Nerd Journalism. How Data and Digital Technology Transformed News Graphics", Alberto Cairo, 2017.

3.2 Data thinking

The second comparative analogy outlined in the proposed framework relates the discipline of data visualization to the qualitative mode of inquiry known as ethnographic approach, in which researchers gather data immersing in the target’s environment, with the aim to understand their intimate goals, challenges, and motivations (Creswell, 2006). Drawing from a user-centered paradigm, this methodology interprets data as a vehicle of interaction and accessibility towards an entire group, domain, or society, in order to decrypt its shared patterns of behaviors, beliefs, and languages, and address contextualized experience within its cultural reality.

Such an attitude resonates in the principle according to which, to transform information into knowledge, data visualization “must share some context and meaning [...] to become encoded and connected to preexisting experience” (Vande Moere, 2012, p. 16), considering participants’ social background, previous thoughts, distinctive abilities or disabilities.

In this sense, a promising field of application seems to be that of data thinking, a lately emerging concept identifying a range of strategies aimed at supporting design processes involved in the creation of new products or services, where the substantial purpose is to achieve a detailed view on data at every single developmental step (Kronsbein, 2019).

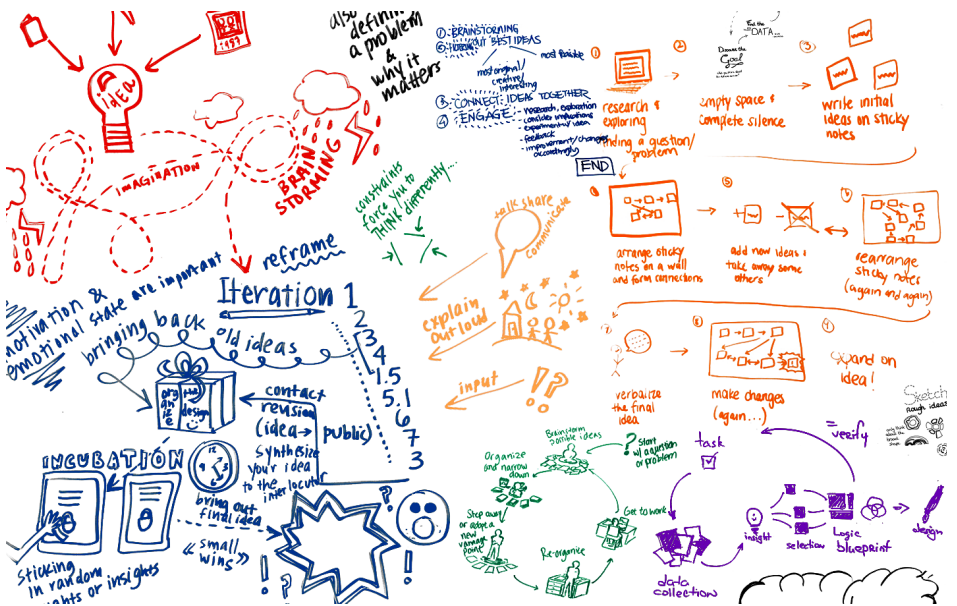

Figure 3. “Process Matters Workshop”, Sense Information Design, 2016.

Understood as a symbiosis of design thinking and data science, the data thinking approach meets the instance for which, “designers need to address the impact of the increasing amounts of data available from a multiplicity of sources and [...] inform how decisions are made” (Newman, 2017, p. 25). This acknowledgement assumes even greater significance if we consider how, in the face of an often-overlooked set of analytical skills, many data practitioners are too focused on accomplishing the usage of specific tools and techniques and not concerned enough with asking the right questions: put the why before the how (Shron, 2014).

Although the concept of data thinking is currently mostly affirmed in the business world, it offers insightful perspectives for addressing more widely the practice of data visualization to better understand people’s mental models, and increase users’ involvement while designing accessible interfaces, interactions, and experiences.

From this point of view, it is particularly significant the approach carried out by the designer and researcher Sheila Pontis, interested in mapping complex data through discerning “what type of information would be more helpful for the intended audience to be displayed in a visual explanation, and with what level of detail” (Pontis, 2018, p. 111). Together with Michael Babwahsingh, in 2013 Pontis founded Sense Information Design, a New York based design consultancy promoting a deeper understanding in all aspects of collaboration and communication, through people-centered experiences aimed at turning complex and unfamiliar messages into useful, meaningful information.

3.3 Data integration

The third comparative analogy outlined in the proposed framework relates the discipline of data visualization to the qualitative mode of inquiry known as grounded theory approach, in which researchers systematically collect and analyze data with the aim of generating or discovering a theory rooted in the views of participants (Creswell, 2006). Compared to the previously introduced ones, the intent of this particular approach is to move beyond the purpose of basic description, pushing towards the grouping of unstructured sources into concepts, categories, and codes, to obtain an analytical schema of a process that contributors have personally experienced.

Such perspective is particularly suitable for framing data visualization into the digital ecosystem, where the design process became deeply intertwined to an array of techniques – such as those of data acquiring, parsing, filtering, mining, representing, refining, interacting (Fry, 2008, p. 5) – which not necessarily involve direct manipulation of visible features.

This assumption paves the way for advancing a connection with the concept of data integration, designating the operations of combining data coming from disparate sources, in order to provide a unified view of them and an enabling environment for translating raw inputs into significant and valuable outputs (Roth, Wolfson, Kleewein & Nelin, 2002). Although drawing mainly from computer sciences and information technology, this concept

is indeed strictly related to data visualization, intended as “the process of making data intelligible, enabling human intuition and expert knowledge to be applied in areas where algorithmic interrogation is unrealistic” (Pettifer & Attwood, 2013, p. 519).

Since data integration establishes itself on a strong principle of collaborative community, where data and the tools for their processing should be mutually shared between users, data visualization can actively contribute to the release of participated theories that are both iterative and reflexive, both contextual and conceptual (Knigge & Cope, 2006).

Involving operational methodologies at the intersection of machine learning, database systems, and business intelligence, the field of data integration purposely requires data visualization designers to become acquainted with competences usually more concerned with profiles such as those of coders, statisticians, or engineers.

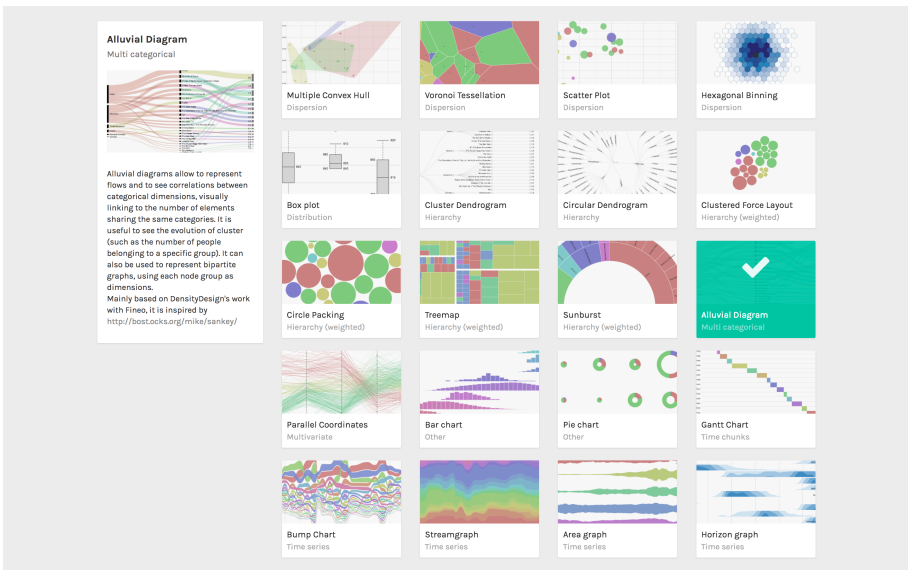

Figure 4. “RAWGraphs”, <https://rawgraphs.io/>

In this perspective, one of the most prominent examples is that of RAWGraphs, an open-source web application for the creation of static and dynamic infographics developed since 2017 by the DensityDesign Lab at the Polytechnic University of Milan, building upon previous work on visualization tools, libraries and platforms. Strongly relying on concepts such as open outputs, reusable charts, and community building, RAWGraphs defines a set of instructions for the creation of specific representations, giving users the ability to change the underlying data and customize their graphical variables (Azzi, Caviglia, Elli, Mauri, Uboldi, 2017).

3.4 Data humanism

The fourth comparative analogy outlined in the proposed framework relates the discipline of data visualization to the qualitative mode of inquiry known as the phenomenological approach, in which researchers aim to describe the meaning of one of more lived experiences for one or more individuals about a specific concept (Creswell, 2006). In comparison to the narrative approach, before than the translation of unstructured data into a story, the fundamental goal of this methodology resides in describing the essential nature of a particular phenomenon, deriving significant arguments and statements about its meaning from evidence provided by those who personally experienced it.

Figure 5. "Dear Data", Giorgia Lupi and Stefanie Posavec, 2016-2017.

If transposed to data visualization, a similar stance suggests the enactment of a methodology in which the design process draws from deeply understanding the causes, consequences, influences and projections referred to a given circumstance, in order to display its connection and significance in relation to everything else (McCandless, 2014).

Such consideration closely intercepts the theoretical dimension of data humanism, which is rooted in the recognition of the interpretative nature of visualization towards the phenomenal world, as “the display itself is conceived to embody qualitative expressions, and the information is understood as graphically constituted” (Drucker, 2014, p. 129).

Standard analysis procedures could lead data practitioners to give priority to numbers before people, losing sight of the most important characteristics which address human beings in gaining self-awareness and developing emotional intelligence: creativity, drive, persistence, motivation, rapport, and empathy (Goleman, 2011). The instances underlying the current of data humanism recall the attention on the personal value of data, interpreting them as a vehicle to construct identities and detect ecologies of meaning, privileging the investigation of small, consistent, and detailed matters rather than big, uneven and scattered ecosystems (Georgakopoulou, 2007).

These are, in short, the foundations and purposes that lay the groundwork for applying a humanistic approach to data visualization, aimed at contextually depicting the uniqueness of phenomena pertaining single individuals' experiences through the graphical representation of their intimate, speculative, and even poetic relationships.

Exemplary, in this perspective, is the work of Giorgia Lupi, Italian information designer and partner at Pentagram Studio, according to which “we are ready to question the impersonality of a merely technical approach to data and to begin designing ways to connect numbers to what they really stand for: knowledge, behaviors, people” (2017). *Dear Data*, probably the most renowned work by Lupi, is a year-long drawing project carried out with Stefanie Posavec: each week, during a year, the two designers collected and measured a particular type of information about their lives, and used these to make a drawing on a postcard-sized sheet of paper, approaching data visualization in a slow, analog, and artisanal way.

3.4 Data publication

The fifth comparative analogy outlined in the proposed framework relates the discipline of data visualization to the qualitative mode of inquiry known as the case study approach, in which researchers explore single or multiple bounded systems, providing accurate, detailed, in-depth insights on data collected from heterogeneous sources (Creswell, 2006). Since the case study approach might loosely select to investigate specific topics drawing from several source, or multiple topics housed within a single source, some disagreement exists about whether this methodology should be considered as an effective type of qualitative research, or instead as an object of study, or even as a product of the analysis.

Dealing with sources is a prominent issue also for what concerns data visualization, since inadequacies in their scientific accountability could lead to misleading or disempowering aspects, such as lack of transparency, merely extractive collection, technological complexity, and deficiency in the control of impact (D'Ignazio & Bhargava, 2015).

In this sense, relevant instances have lately been pointed out by the emerging research field of data publishing, a practice through which data are made public in accordance with associated policies guaranteeing that their provenance, attribution, and truthfulness are appropriately tracked (Candela, Castelli, Manghi & Callaghan, 2017).

Although a general agreement is still to be reached, the academic community started to recognize the need to define specific standards aimed at documenting and referencing the processes underlying the publication of data (Austin, Bloom, Dallmeier-Tiessen, Khodiyar, Murphy, Nurnberger, Raymond, Stockhouse, Tedds, Vardigan & Whyte, 2016) In parallel, many important companies, organization and institutions throughout the world have extended their corporate image systems to include guidelines specifically calibrated for the visual display of information, acknowledging “the growing importance of using data [...] and the value of branding them appropriately” (Cesal, 2019).

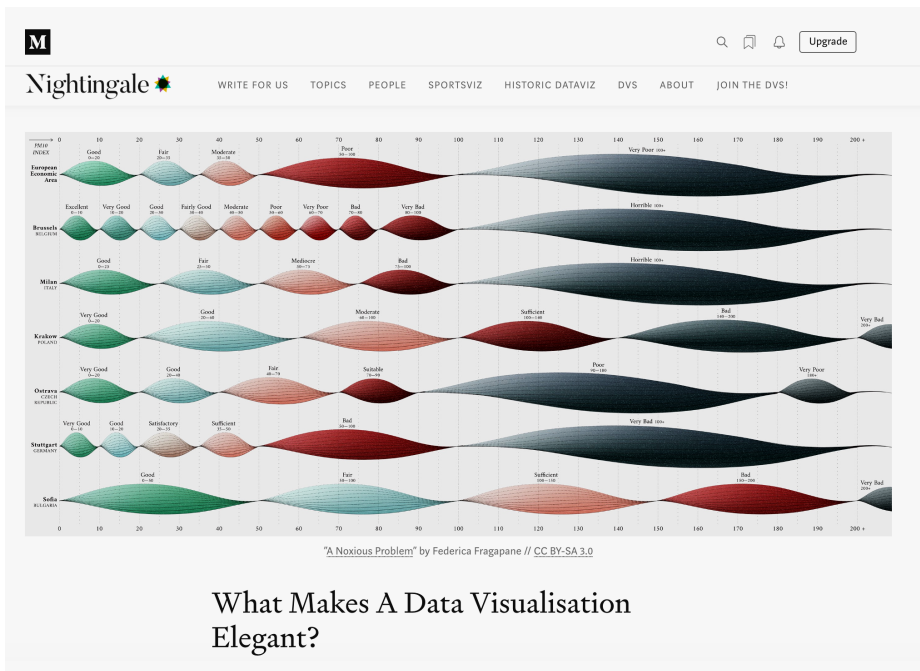

Figure 6. “Nightingale – Journal of the Data Visualization Society”, <https://medium.com/nightingale>

Although their formalization into more codified principles is still in progress and mostly empirical, these signals warn us about how the massive spreading of data visualization across analog and digital media calls for an institutional environment able to supervise the circulation of information and establishing protocols for its usage on a case-by-case basis.

Remarkable, in this sense, is the work recently carried out by the Data Visualization Society, instituted in 2018 by Amy Cesal, Mollie Pettit and Elijah Meeks in order to “address that lack of professional development in the field, create a larger community, and [...] establish guidelines for professional development” (Meeks, 2019). The Data Visualization Society has also founded *Nightingale*, a digital journal based on the *Medium* publishing platform, with the aim to provide high-quality daily articles covering many aspects of data visualization, including education, entertainment, history, sports, best practices, new techniques, and many other.

4. Conclusions

In conclusion, the framework proposed in this dissertation seems to confirm the hypothesis of an inherent correlation existing between the practice of data visualization and the domain of qualitative research, reciprocally concerning both their underpinning theoretical assumptions and the methodologies applied for investigation purposes. The revealed analogies appear consistent and pertinent, as the corresponding fields of application put forward relevant issues about data – such as those related to their readability, accessibility, usability, personality, and accountability – opening insightful perspectives for practitioners involved in this disciplinary and professional field.

More generally, the involvement of visual semantics can act a powerful mean for leveraging the cultural value of information in order to enhance the spread of data literacy, and is mainly in this sense that data visualization could be intended as a qualitative driver in the processes of generating, organizing, and communicating knowledge.

At the same time, the outlined framework presents also several questionable criticalities, as in the first place the limited number of design examples presented in relation to the five identified categories, which amount could be enriched and implemented with additional references that may have not been here considered. Furthermore, as already mentioned in several passages of this contribution, the arguments upon which the framework itself is articulated rely on an overtly interpretative stance: an aspect, this, which would necessarily imply further inquiry to appropriately validate the effectiveness of the advanced classification.

In any case, this study has provided presumptive evidence to affirm that promoting and enhancing occasions of cooperation, contamination, and fertilization between the fields of data visualization and qualitative research could lead to account the shift from a paradigm founded on data accumulation to one oriented to data signification.

A greater involvement of qualitative research procedures in data visualization would encourage the latter in developing a deeper inclination towards incorporating principles of understanding, participation, cooperation, empathy, and openness, as well as a stronger proclivity in operating in contexts and conditions of uncertainty. Data visualization, in turn, could contribute to the realm of qualitative inquiry by offering a design-oriented perspective, aimed at providing ad-hoc formats and layouts to support researchers in organizing informational contents, as well as at arranging visual shortcuts for helping them in exploring their data more effectively.

More comparative research focused on this specific, intertwined analogy would definitely be welcomed and recommended, acknowledging how the quest for a broader theoretical systematization could contribute to address data visualization in fully unleashing all its communicative, cultural, and ultimately qualitative potential.
